

Acute (Non-ESRD) Outpatient Standing Orders

1. **PROTOCOLS:** Non-ESRD Acute patients will **not** be treated using the chronic hemodialysis protocols including maintenance hemodialysis standing orders or any medication protocols, i.e. Erythropoietin, IV iron, Paricalcitol.

2. **LABS:**
 - a. Draw chemistries (NKC Special profile) and CBC weekly.
 - b. Notify MD when creatinine is less than 2.5 mg/dL unless patient was started with a creatinine less than 2.5 mg/dL.

3. **CHANGE TO ESRD:** Any Non-ESRD Acute dialyzing more than four weeks will be deemed chronic and entered into the ESRD program.
