**To connect your laptop to the wireless network while at any
NKC facility:**

(assumes your laptop has a Cisco or Intel wireless network card and a
Windows XP or equivalent operating system)

- Step 1: Right Click on “My Network Places”
Left Click on “Properties”

- Step 2: Double-click on “Wireless Network Connection”
Left Click on “Wireless Networks” tab
Left Click on “Add”

- Step 3: Enter “public” in the “Network name (SSID)” field
Select “Disabled” in the “Data encryption” field
Click “OK” button at bottom of screen

- Step 4: Restart your computer.

- Step 5: Hit the cyberREN icon.
