

Home Hemo with NxStage

*A dialysis machine that makes
home hemo easier*

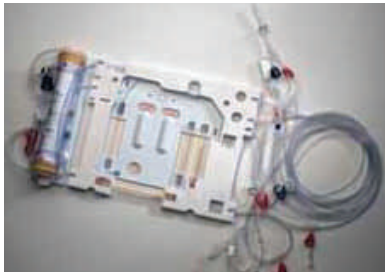

User-friendly for patients

- NxStage is less complicated than a center machine
- Designed so that you can operate it on your own
- Many patients do their whole treatment without any help
- Designed for treatments 5-6 times a week

Disposable supplies

- Cartridge with dialyzer and tubing already connected
- Fast set up
- Everything goes into your garbage after dialysis
- Supplies delivered to your home monthly
- You need storage space for boxes of supplies

No installation!

- Just plug it in
- No plumbing or wiring changes
- NxStage uses prepackaged bags of dialysate instead of gallons of water to make dialysate
- You can move it around your home
- Weighs just 75 pounds

You can take dialysis with you

- Travel with Nxstage—put it in your car, dialyze in an RV, check it as baggage on a plane
- Supplies can be delivered ahead to your destination in the U.S. (except for Alaska and Hawaii)
