

Dialysis Facility Report for Fiscal Year (FY) 2016

Purpose of the Report

The *Dialysis Facility Report (DFR) for FY 2016* is provided as a resource for characterizing selected aspects of clinical experience at this facility relative to other caregivers in this state, ESRD Network, and across the United States. Since these data could be useful in quality improvement and assurance activities, each state's surveying agency may utilize this report as a resource during the FY 2016 survey and certification process.

This report has been prepared for this facility by the University of Michigan Kidney Epidemiology and Cost Center (UM-KECC) with funding from the Centers for Medicare & Medicaid Services (CMS) and is based primarily on Medicare claims and data collected for CMS. It is the twentieth in a series of annual reports. This is one of 6,620 reports that have been distributed to ESRD providers in the U.S.

This DFR includes data specific to CCN(s): 502520

Overview: This report includes summaries of patient characteristics, treatment patterns, and patient outcomes for chronic dialysis patients who were treated in this facility between January 2011 and December 2014. Mortality, hospitalization, and transplantation statistics are reported for a three- or four-year period. Regional and national averages are included to allow for comparisons. Several of the summaries of patient mortality, hospitalization, and transplantation are adjusted to account for the characteristics of the patient mix at this facility, such as age, sex and diabetes as a cause of ESRD. Unless otherwise specified, data refer to hemodialysis (HD) and peritoneal dialysis (PD) patients combined.

Selected highlights from this report are given on pages 2 through 4. For a complete description of the methods used to calculate the statistics in this report, please see the *Guide to the Dialysis Facility Reports for FY 2016*. The *Guide* may be downloaded from the methodology section of the Dialysis Data website at www.DialysisData.org.

What's New This Year: As part of a continuing effort to improve the quality and relevance of this report for your facility, the following changes have been incorporated into the DFR for FY 2016. A new section reporting readmission summaries for each year along with regional comparison values have been added to Table 2. The CROWNWeb clinical data table (Table 14) has added information on the ultrafiltration ratio among hemodialysis patients.

How to Submit Comments

Between July 15, 2015 and August 15, 2015, facilities may submit comments to their state surveyor or UM-KECC by visiting www.DialysisData.org, logging on to view their report, and clicking on the **Comments & Inquiries** tab. Questions or comments after the comment period is over may be submitted to us directly at DialysisData@umich.edu or 1-855-764-2885.

- (1) **State Surveyor:** Dialysis facilities may submit comments on the DFR for their state's surveyors. State surveyor(s) will receive a copy of their DFR with the comments they submitted in September 2015.
- (2) **UM-KECC:** Submit questions or suggestions to improve the DFR to UM-KECC. These comments will not be shared with CMS or your state surveyor.

Facility Highlights

Standardized Mortality Ratio (SMR) (Table 1):

- At this facility, the 2011-2014 SMR is 1.00, which is equal to the national reference value of 1.00. The 2011-2014 SMR of observed to expected deaths is 0.98 and 0.95 for your State and Network, respectively.

The markers show the values of the SMR for this facility, State, Network, and Nation. The bolded horizontal line shows the range of uncertainty due to random variation (95% confidence interval; significant if it does not cross the 1.0 reference line). Regional and national SMR are plotted above the dotted line to allow for comparisons to facility values.

- At this facility, the 2011-2013 first-year SMR of observed to expected deaths is 1.03, which is 3% more deaths than expected at this facility. Among all U.S. facilities, 57% of facilities had a first-year SMR lower than 1.03. This difference is not statistically significant ($p \geq 0.05$), so this higher mortality could plausibly be just a chance occurrence. The first-year SMR (2011-2013) of observed to expected deaths is 0.85 and 0.83 for your State and Network, respectively.

Standardized Hospitalization Ratio (SHR) (Table 2):

- The 2011-2014 SHR (ED) at this facility is 1.04, which is 4% more ED visits than expected. This difference is not statistically significant ($p \geq 0.05$), so this higher ED visit ratio could plausibly be just a chance occurrence. The 2011-2014 SHR (ED) for your State and Network is 0.97 and 0.95, respectively.
- The 2011-2014 SHR (Days) at this facility is 0.76, which is 24% fewer days hospitalized than expected. This difference is not statistically significant ($p \geq 0.05$), so this lower hospitalization could plausibly be just a chance occurrence. The 2011-2014 SHR (Days) for your State and Network is 0.72 and 0.70, respectively.
- The 2011-2014 SHR (Admissions) at this facility is 0.99, which is 1% fewer admissions hospitalized than expected. This difference is not statistically significant ($p \geq 0.05$), so this lower hospitalization could plausibly be just a chance occurrence. The 2011-2014 SHR (Admissions) for your State and Network is 0.89 and 0.87, respectively.

The markers show the values of the SHR (Admissions) for this facility, State, Network, and Nation. The bolded horizontal line shows the range of uncertainty due to random variation (95% confidence interval; significant if it does not cross the 1.0 reference line). Regional and national SHR (Admissions) are plotted above the dotted line to allow for comparisons to facility values.

Infection (Tables 2 and 8):

- The percentage of Medicare dialysis patients at this facility hospitalized with septicemia during 2011-2014 was 8.5%, compared to 11.3% in your State, 10.1% in your Network, and 10.9% nationally.
- The rate of HD infection among HD patients at this facility in 2014 was 0.7 per 100 HD patient-months, compared to 1.7 in your State, 1.6 in your Network, and 1.7 nationally.
- The rate of PD catheter-related infection was 0.0 per 100 PD patient-months, compared to 3.6 in your State, 2.9 in your Network, and 3.1 nationally.

Transplantation (Table 3):

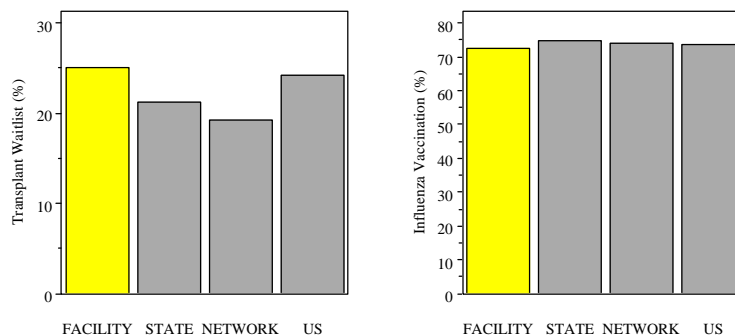

- Of the patients under age 70 treated at this facility during 2011-2014 who had not previously received a transplant, 8% were transplanted annually, while a rate of 4% would be expected for these patients.
- The 2011-2014 Standardized 1st Transplantation Ratio (STR) of observed to expected number of patients transplanted for this facility is 1.91, which is 91% higher than expected for this facility. This difference is statistically significant (p<0.05) and is unlikely to be due to random chance. The 2011-2014 STR for your State and Network is 1.42 and 1.30, respectively.

Transplant Waitlist (Table 4):

- Among the 80 dialysis patients under age 70 treated at this facility on December 31, 2014, 25% were on the kidney transplant waitlist compared to 24% nationally. This difference is not statistically significant (p>=0.05) and is plausibly due to random chance. The percentage of patients on the kidney transplant waitlist on December 31, 2014 in your State and Network is 21% and 19%, respectively.

Influenza Vaccination (Table 5):

- Among the 76 Medicare dialysis patients treated at this facility on December 31, 2014, 72% were vaccinated between August 1 and December 31, 2014 compared to 74% nationally. This difference is not statistically significant (p>=0.05) and is plausibly due to random chance. The percentage of patients vaccinated in your State, Network, and nation is 75%, 74%, and 74%, respectively.

Dialysis Facility Report for FY (FY) 2016

NKC AUBURN KIDNEY CENTER State: WA Network: 16 CCN: 502520

Practice Patterns (Tables 6 and 7):

- Among the 85 ESA-treated dialysis patients included in the analysis in 2014, the average hemoglobin calculated is 10.4 g/dL, compared to 10.5 g/dL in your State, 10.5 g/dL in your Network, and 10.5 g/dL nationally.
- Among the 91 HD patients in this facility included in the analysis in 2014, 100% had URR above the KDOQI minimum value for URR (65%), compared to 99% in your State, 99% in your Network, and 99% nationally.
- In 2014, 92% of eligible HD patient-months had a Kt/V \geq 1.2, compared to 93% in your State, 93% in your Network, and 93% nationally.
- In 2014, 17% of eligible PD patient-months had a Kt/V \geq 1.7, compared to 89% in your State, 86% in your Network, and 84% nationally.
- At this facility in 2014, an average of 37% of incident patients had arteriovenous (AV) fistulae in place, compared to 31% in your State, 30% in your Network, and 22% nationally.
- Of the prevalent patients receiving hemodialysis treatment at this facility in 2014, 5% had a catheter which had been in place for at least 90 days as their only vascular access, compared to 7% in your State, 7% in your Network, and 9% nationally.

Patient Characteristics (Tables 9 and 10):

- Among the 36 patients with Medical Evidence Forms (CMS-2728) indicating treatment at this facility during 2014:
 - 8% of these patients were not under the care of a nephrologist before starting dialysis, compared to 19% in your State, 20% in your Network, and 25% nationally.
 - 72% of these patients were informed of their transplant options, compared to 70% in your State, 74% in your Network, and 83% nationally.
- Among the patients treated at this facility on December 31, 2014, 16% were treated in a nursing home during the year, compared to 14% nationally.

n/a = not applicable

[*1] See Guide, Section IV.

[*2] Values are shown for the average facility, annualized.

[*3] Defined as deaths due to street drugs and accidents unrelated to treatment.

[*4] Calculated as a ratio of deaths to expected deaths (1c to 1d for all patients, 1n to 1o for new patients); not shown if there are fewer than 3 expected deaths.

[*5] A p-value less than 0.05 indicates that the difference between the actual and expected mortality is probably real and is not due to random chance alone, while a p-value greater than or equal to 0.05 indicates that the difference could plausibly be due to random chance.

[*6] The confidence interval range represents uncertainty in the value of the SMR due to random variation.

[*7] All facilities are included in ranking, regardless of the number of expected deaths.

[*8] Sum of 4 years (all patients) or 3 years (new patients) used for calculations; should not be compared to regional averages.

| High (97.5% limit) | 1.25 | 1.46 | 1.28 | 1.47 | n/a | n/a | n/a | n/a |
| Low (2.5% limit) | 0.64 | 0.80 | 0.66 | 0.79 | n/a | n/a | n/a | n/a |

n/a = not applicable.

[*1] Based on patients with Medicare as primary insurer; see *Guide, Section V*.

[*2] Values are shown for the average facility, annualized.

[*3] Sum of 4 years used for calculations; should not be compared to regional averages.

[*4] Standardized Ratios are calculated as ratio of actual to expected events (2c/2d for days, 2i/2j for admissions, 2r/2s for ED visits, and 2ab/2ac for readmissions). SHRs are not shown if there are less than 5 patient years at risk.

[*5] SRR is not shown if fewer than 11 index discharges in the year.

[*6] A p-value less than 0.05 indicates that the difference between the actual and expected event is probably real and is not due to random chance alone, while a p-value greater than or equal to 0.05 indicates that the difference could plausibly be due to random chance.

[*7] The confidence interval range represents uncertainty in the value of the standardized hospitalization and readmission ratios (SHRs and SRR) due to random variation.

[*8] All facilities are included in ranking, regardless of the number of patient years at risk.

[*9] Includes diagnoses present at admission and diagnoses added during the hospital stay.

| Asian/Pacific Islander | 22.2 | 22.7 | 23.8 | 20.8 | 26.7 | 26.5 | 35.7 |
| Native American | 33.3 | 50.0 | 50.0 | 100 | 10.4 | 14.2 | 17.7 |
| White, Hispanic | 0.0 | 33.3 | 25.0 | 16.7 | 21.3 | 18.3 | 27.2 |
| White, non-Hispanic | 30.2 | 15.9 | 21.2 | 33.3 | 20.3 | 18.6 | 22.9 |
| Other/unknown race | . | . | . | . | 9.1 | 10.0 | 22.6 |
| Diabetes | 21.1 | 14.6 | 23.8 | 26.2 | 16.0 | 14.2 | 19.8 |
| Non-diabetes | 27.7 | 27.3 | 21.4 | 23.7 | 25.6 | 23.5 | 27.7 |
| Previous kidney transplant | 36.4 | 38.5 | 44.4 | 50.0 | 37.8 | 33.8 | 43.6 |
| No previous kidney transplant | 23.0 | 18.1 | 20.0 | 20.6 | 19.4 | 17.7 | 22.4 |
| < 2 years since start of ESRD | 9.4 | 7.1 | 10.8 | 20.0 | 16.0 | 14.7 | 16.3 |
| 2-4 years since start of ESRD | 26.1 | 30.8 | 27.3 | 23.5 | 25.6 | 23.5 | 29.0 |
| 5+ years since start of ESRD | 40.0 | 25.8 | 36.0 | 32.1 | 23.1 | 20.7 | 27.9 |

n/a = not applicable [*1] See *Guide, Sections VI* (Table 3) and *VII* (Table 4). [*2] Values are shown for the average facility. [*3] Values may not sum to 3b due to unknown donor type. [*4] Among first transplants that occurred after the start of dialysis from 2011-2014, 3.8% of transplants in the U.S. were not included because the transplant occurred fewer than 90 days after the start of ESRD and 1.1% were not included because the patient was not assigned to a facility at time of transplant. [*5] This section is calculated for the 4-year period only and not reported if there are fewer than 3 expected transplants. [*6] Standardized 1st Transplantation Ratio calculated as ratio of actual (3f) to expected (3g) transplants. [*7] A p-value less than 0.05 indicates that the difference between the actual and expected transplants is probably real and is not due to random chance, while a p-value greater than or equal to 0.05 indicates that the difference is plausibly due to random chance. [*8] The confidence interval range represents uncertainty in the value of the STR due to random variation. [*9] All facilities are included in ranking, regardless of the number of expected transplants. [*10] Sum of 4 years used for calculations; should not be compared to regional averages. [*11] Facility waitlist percentage is compared to the U.S. waitlist percentage for that year: 24.3% (2011), 24.4% (2012), 24.5% (2013), 24.1% (2014). A p-value greater than 0.05 indicates that the difference between percent of patients waitlisted at the facility and national percentage is plausibly due to random chance. [*12] A missing value indicates that there were no eligible patients in the subgroup.

| 6ac Adult PD: Kt/V >=1.7 (% of 6z) ^{*10} | 71.4 | 100 | 0.0 | 16.7 | 89.2 | 86.1 | 83.7 |

n/a = not applicable

[*1] See *Guide, Section IX*. [*2] Values are shown for the average facility. [*3] Patients may be counted up to 12 times per year.

[*4] Other dialysis includes patients who switch between HD and PD during the month and patients for whom modality is unknown or missing.

[*5] Percent of patient months represented by the corresponding modality percent in 6c. [*6] Sum of eligible HD and PD patients may not add to 6c.

[*7] Claims identified as having 4 or more dialysis sessions per week were excluded from the URR calculations. Among eligible claims in the US, less than 2% were excluded due to frequent dialysis in 2011-2014.

[*8] Claims identified as having 2 or fewer, or 4 or more adult dialysis sessions per week were excluded from the Kt/V calculations.

[*9] Collection of the measures calculated in this section began in July 2010. Includes patients with Medicare as primary insurer and based on the value code D5: Result of last Kt/V.

[*10] Values calculated based only on Kt/V values reported in range.

[*11] Calculated as a ratio of observed transfusions to expected transfusions (6n to 6o); not shown if there are fewer than 10 patient-years at risk for transfusions.

[*12] A p-value less than 0.05 indicates that the difference between the actual and expected transfusion is probably real and is not due to random chance alone, while a p-value greater than or equal to 0.05 indicates that the difference could plausibly be due to random chance.

| 8k | P-value ^{*10} for 8j (compared to U.S. value) ^{*12} | 0.272 | 0.803 | 0.780 | 0.802 | n/a | n/a | n/a |

n/a = not applicable

[*1] See *Guide, Section X* (Table 7) and *Section XI* (Table 8).

[*2] Values are shown for the average facility.

[*3] Patients may be counted up to 12 times per year.

[*4] Includes all patients with fistulae, regardless of whether or not they received their hemodialysis treatments using their fistulae.

[*5] Catheter was used for treatment and has been in place for 90 days or more prior to treatment. Patient does not have an fistula or graft in place. Catheter is only access. Port access devices are reported as catheters for this project.

[*6] (Patients listed as graft or catheter may have had fistulae in place for future use, but they actually received their treatment through a graft or catheter.) Based on V modifiers including V5, V6, and V7 for catheter, graft, and fistula (with two needles), respectively.

[*7] Vascular access section includes adult patients only. Pediatric vascular access data can be found in the pediatric table.

[*8] Other includes patients with >1 access type; it does not include missing access type.

[*9] The ICD-9 infection code for HD patients is 996.62. The ICD-9 PD catheter infection code for PD patients is 996.68.

[*10] A p-value greater than or equal to 0.05 indicates the differences between the percent of patients with infection at the facility and national percentage is plausibly due to random chance.

[*11] Compared to U.S. value for that year: 2.58 (2011), 2.22 (2012), 1.87 (2013), and 1.68 (2014).

[*12] Compared to U.S. value for that year: 3.13 (2011), 3.08 (2012), 3.05 (2013), and 3.10 (2014).

[*1] See *Guide, Section XII*.

[*2] Values are shown for the average facility.

[*3] For continuous variables, summaries include only responses in range indicated in brackets.

[*4] 'Asian' includes Indian sub-continent. 'Native American' includes Alaskan Native. 'White' includes Middle Eastern and Arabian.

[*5] The median BMI is computed for adult patients at least 20 years old with height, weight and BMI values in acceptable ranges. Acceptable range for height, weight and BMI are 122-208cm, 32-318 kg and 10-55 respectively.

[*6] Full-time, part-time, or student (% of 18-60 year olds).

[*7] 'Atherosclerotic heart disease' includes ischemic heart disease (coronary artery disease) and myocardial infarction. 'Other cardiac disorder' includes cardiac arrest, cardiac dysrhythmia, and pericarditis. 'Diabetes' includes patients with diabetes as the primary cause of ESRD.

[*8] Values may not sum to exactly 100% because of patients that received nephrology care but duration unknown. (0.03% in US in 2014).

| Missing/Out of range | | 0.5 | 1.4 | 1.2 | 3.8 | 5.0 | 7.4 |

n/a = not applicable.

[*1] See *Guide, Section XVII*.

[*2] Values are shown for the average facility.

[*3] 14a includes those who switch between HD and PD during the month and patients for whom modality is unknown.

[*4] Patients may be counted up to 12 times per year.

[*5] Sum of eligible HD and PD patients may not add to 14a.

[*6] Based on in-range values; see *Guide* for range values.

[*7] Kt/V summaries are restricted to patients who dialyze thrice weekly.

[*8] The PD Adequacy section uses the most recent value over a 4-month look-back period. Therefore, reporting for PD in this table begins with August 2012 which includes a look-back through May 2012.

[*9] A missing value indicates that there were no eligible patients in the subgroup.

[*1] See *Guide, Section XVIII*. Data on this table are from the facility's latest survey since January 2009. If your facility has not been surveyed since January 2009, facility-level data on this table will be missing.

[*2] Regional values are the percentage of surveys that were cited for the respective CfC deficiency.

TABLE 16: Facility Information^{*1}, 2015

| Characteristic | This Facility |
|--|--------------------------------------|
| Ownership | Non-profit |
| Organization | NORTHWEST KIDNEY CENTERS |
| Initial Medicare certification date | 01/13/1997 |
| Number of stations | 12 |
| Services provided | Hemodialysis and Peritoneal Dialysis |
| Shifts after 5:00 pm | Yes |
| Dialyzer Reuse | |
| CMS Certification Number (CCN) included in this report | 502520 |
| National Provider Identifier (NPI) ^{*2} | 1881789006 |
