We want to continue to keep you and your family healthy

Dear Northwest Kidney Centers patient,

Thank you for being careful to protect your health and the health of others.

- **Please tell us if you live with someone who is getting tested for COVID-19 or has COVID-19, and continue to come to dialysis.**

We will take special precautions with your treatment while your household member is getting tested.

We want to know your household member's test result for COVID-19.

We will work with you and your physician to help determine if you need to be tested and how to continue to keep you healthy.

- **Plan to get a flu shot in a few weeks at your dialysis clinic.** We will let you know when the flu vaccine is available. It's especially important this year.
- **Start thinking about winter weather.** We're seeing signs of fall outdoors. Do you have a plan to get to dialysis when the weather gets cold and wet? Do you need emergency diet supplies in case you can't get out?
- **Remember the three W's:** Wear a mask, Watch your distance (6 feet from others), Wash your hands.

Wishing you a healthy, happy autumn.
